

# ENERGY ROADSHOW

Three-days in the name of the energy!

20-21-22 June 2013

At the Natural Sciences Museum  
P.zza Zangheri, 6 Cesena

On the occasion of the European Week of the Renewable Energy 2013, CENTURIA, in collaboration with the Municipality of Cesena, organizes three days dedicated to the energy with the opening of the **Energy Point**, a new permanent section dedicated to the energies of the past and of the future, that will be realized in the Natural Sciences Museum of the Municipality of Cesena.

## The Energy Point and the SEA-R project:

The Energy Point, financed by the IPA Adriatic Cross-border Cooperation Programme with the European project SEA-R (Sustainable Energy in the Adriatic Regions: knowledge to Invest) whose Centuria and the Municipality of Cesena are partners – has been realized in collaboration with the Centro Ricerche Produzioni Vegetali (CRPV) and Romagna Innovazione.

## What can you find in the Energy Point?

Educational kits and demonstration of biomass and biofuels, wind energy, solar thermal and photovoltaic. A path formed by 30 poster that explains the importance of the energy saving, the renewable energy sources, the technologies to use them and their sustainability.

In the multimedia corner, you can surf the Energy Point's website, where you will be plunged in a virtual world full of information, with different browsing paths adaptable to everybody: students, families, technicians, educators, teachers ...

Finally, the interactive tools will get you used to the possible energy options characterized by a reduced environmental impact, that can be used at home, and to the role that the Renewable Energy Sources can have in promoting the sustainability of agriculture. This three-day event aims at presenting this new reality of the territory of Cesena and at giving life to a weekend of June with "energy" initiatives: laboratories and guided tours to the Energy Point, visits "at Ø impact" to places and experiences that Cesena has put in practice to promote the sustainability.

## We are waiting for you!

## PROGRAM

### Thursday, June 20

- 10.00 – 12.30**      **Workshops on renewable energy** at the Energy Point
- 11.30**              **Opening of the Energy Point and Press Conference** at the Museum of Natural Sciences  
Paolo Lucchi, Mayor of Cesena  
Lia Montalti, Councillor for Environmental Sustainability of the Municipality of Cesena  
Piero Gallina, Centuria  
Giovanni Riva, Polytechnic University of Marche  
Eugenio Cozzolino, CRPV  
Mario Farnetti, Rinnova
- 12.15**              **Aperitif at the Energy Point**
- 15.00 – 17.30**      **Workshops on renewable energy** at the Energy Point
- 17.30**              **Cesena Sustainable Cesena: visits "atØ impact " to projects of the Municipality of Cesena**  
- Visit at the Energy Point  
- Info session of the European project PassREg: a passive house in Cesena  
- Meeting with Energie per la città spa in the project "Boilers in network"  
- The Water House  
Aperitif on the Lungo Savio

### Friday, June 21

- 15.00 – 17.30**      **Workshops on renewable energy** at the Energy Point
- 20.30**              **Presentation of the Energy Point**
- 21.00**              **Game-conference "Energy, from the past to the future"** with Matthew Pompili, Tecnoscienza Association  
Free show, open to all citizens on the topic of renewable energies in a new and funny way!

### Saturday, June 22

- 10.00 – 12.00**      **Open Doors at the Energy Point:** visits, observations, games, reading, surfing ....

## All initiatives are free

### INSTRUCTIONS FOR USE:

The three days are planned, coordinated and managed by Centuria in collaboration with CRPV and Controvento.

All the initiatives will be held or will start from the **Museum of Natural Sciences** in Piazza Zangheri 6.

For workshops and visits "at Ø impact" **registration is needed** at the number 339 7381538 (Nadia) or 340 6074950 (Giulia) by 18 June 2013.

**Workshops on renewable energy:** we will make a funny guided tour, a chat rich of scientific experiences and challenges to discover renewable energies in all their forms, a journey into the web among games and touch technology to explore and discover how to save energy.

**Game-conference:** since it appeared, the genus Homo had to deal with the energy problem. The exploration of the past will allow to reflect on the future energies through a new communication format: interactive, funny and informal.

**Visit "at Impact Ø":** a walk around the town and along the river to discover the face of sustainable Cesena. Max 30 participants.
